

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

such regulation and control as will prevent waste, extravagance and monopoly; but will at the same time, not merely promote, but encourage such use and development as will serve the interests of the people generally."

ELIZABETH LARRABEE

*Smithsonian Institution. Bureau of American Ethnology, Bulletin 70. Prehistoric Villages, Castles and Towers of Southwestern Colorado.* By J. WALTER FEWKES, Washington, 1919, pp. 79 + 33 plates.

The prehistoric ruins with which this work deals are located in southwestern Colorado, New Mexico, Arizona and Utah, the domain of the Cliff-dwellers. The purpose of this article, as stated by the author, is to apply the observations which he made on trips taken in 1917 and 1918 to this region to the determination of the culture of the prehistoric period.

Reference is made to the works of Jackson, Holmes, Morgan, Prudden, Nordenskiöld and others in this field. The ruins are classified in four groups, (1) villages or clusters of houses, (2) cliff-houses, (3) towers and great houses, and (4) rooms. Following is a more or less minute description of about sixty different ruins. The description is illustrated by many drawings to show the location and ground plans of the ruins, and also by an appendix containing seventy-one photographic views of the various ruins. Some space is given to the Grass Mesa, the cemetery, the artificial reservoirs, the pictographs and the pottery and stone implements found in this region. Finally, the author draws from the foregoing analysis conclusions as to the culture of the period.

This article will be of greatest interest to those working in the field of American ethnology, as it summarizes what has been done and shows that much remains to be done in the way of excavation and reconstruction of the ruins.
